

2014-01-27

This was the first “real” meeting. It was quite short. Hugh introduced me to the people on the same project. Until next time, in two weeks, he is going to see if I can get access to the final year project room. In other words get me a workspace. I will be trying to make a demo of the graphical interface and learn more about nodejs/phonegap.

Summary

- Workspace
- GUI
